SCALAR LIGHT / READING COLLECTION

INSPIRED BY TOM PALADINO

Scalar Energy for the World

Volume 3

Nikolai Kozyrev, Time & the Stars

> An astronomer who captured Tom’s imagination.
> Exploring his ideas about time, light and connection.

A revised interpretation of Tom Paladino’s original booklet.
Historical context, personal beliefs and scientific evidence
are distinguished throughout.

BEFORE YOU BEGIN

A note on this edition

Inspired by Tom Paladino, this booklet revisits his original Scalar Energy for the World, Vol. 3. It preserves his interest in Nikolai Kozyrev and the questions that drew him to astronomy: what powers the stars, what time means and how the universe is connected.

This is an adaptation, rather than a reproduction of Tom's writing. His viewpoint is described in the third person, with one exact excerpt. Historical context and scientific explanations have been added. Those additions should not be read as statements written or approved by Tom.

READING WITH PERSPECTIVE

Tom's scalar energy explanations are presented as his beliefs and interpretations, not established scientific findings. Neither astronomy nor the experiments described here establishes medical effects for Scalar Light. It is a non-medical wellness service for personal and spiritual exploration, not a substitute for healthcare.

The Astronomer & the Questions **03**

The Freedom to Discover **04**

The Energy of the Universe **05**

Connection, Meaning & Tom's Perspective **06**

Tom Paladino & Further Exploration **07**

Sources & Notes on the Adaptation **08**

01 / THE BACKGROUND

The Astronomer & the Questions

The life and ideas that interested Tom.

Tom’s preface introduces Nikolai A. Kozyrev as an astronomer whose thinking reached beyond familiar explanations. His account follows Kozyrev from studies in Leningrad to observatory work, imprisonment under Stalin and a return to research after release.

Kozyrev’s colleague Alexander Dadaev also recounts the interruption of his career by imprisonment in 1936 and his release in 1946. This history gives the story a human weight of its own; it does not establish the later physical claims. [2]

What powers the stars?

Tom linked Kozyrev’s ideas about time with his own understanding of scalar energy. He described spiralling energy acting upon an underlying “ether”, helping to form matter and sustain the stars. This was Tom’s interpretation, not a demonstrated account of stellar physics. [1]

The original preface also describes the Sun’s centre as hollow and cool, and presents scalar energy as an alternative to nuclear fusion. That description conflicts with established solar science. The Sun has a dense, extremely hot core where nuclear fusion produces its energy. [3]

A QUESTION IS NOT A CONCLUSION

Kozyrev’s questions about time and stellar energy can be discussed without treating Tom’s double-helix imagery, “ether” explanation or scalar terminology as proven mechanisms.

What Tom admired was the willingness to ask a large question and keep thinking through difficult circumstances. Preserving that admiration does not require presenting every proposed answer as correct.

02 / OBSERVATION & TIME

The Freedom to Discover

What starlight can tell us, and what Tom inferred.

AI concept illustration of time and observation; not Kozyrev’s apparatus.

Tom described Kozyrev returning to experiments and observing the sky in a new way. In his account, a special signal could reveal a star’s present position rather than the position shown by light arriving from the past. [1]

There is a real starting point here: light takes time to reach us. A distant star is therefore seen as it was when that light began its journey. NASA’s explanation of telescope observations makes this distinction clear. [4]

Tom then proposed a much larger conclusion: signals billions of times faster than light, a pre-existing connection between stars and Earth, and instantaneous communication. The original supplies no data, experimental methods or independent confirmation that establishes those claims.

OBSERVATION AND INTERPRETATION

Seeing old starlight does not demonstrate an instantaneous alternative signal. The material reviewed here does not establish real-time scalar observation, faster-than-light communication or a universe proven to be a hologram.

03 / MOTION & GRAVITY

The Energy of the Universe

The gyroscope experiments in Tom’s account.

AI concept illustration of a gyroscope; not Kozyrev’s actual experiment.

The next chapter turns from telescopes to gyroscopes. Tom recounted changes in measured weight during rotation, linking them with the Coriolis effect, scalar energy and the source of gravity. He also described the possibility of anti-gravity propulsion. [1]

The original calls these weight changes independently replicated, but gives no supporting studies, measurements or methods. That statement is not retained as an established finding. A reported change in a scale reading would also need careful checks before it could be attributed to a new force.

For example, a convincing test would need to account for vibration, air movement, temperature, the instrument’s stability and how forces reach the balance. A result must be repeatable under controlled conditions; interpretation comes after that.

WHAT THE ACCOUNT DOES NOT ESTABLISH

The material reviewed here does not show that scalar energy causes gravity or that a spinning apparatus enables anti-gravity travel. Tom’s interest in those possibilities is preserved as his perspective, not a demonstrated capability.

04 / THE WIDER VISION

Connection, Meaning & Tom’s Perspective

The outlook running through the original booklet.

Tom brought the astronomical stories together into a picture of a connected universe. He used “Life Force” to describe what he believed sustained creation and allowed communication beyond ordinary distance and time.

His conclusion makes that personal interpretation explicit:

> “In conclusion, Kozyrev’s observations point to the fact that scalar energy transcends time and space as the universe utilizes the Life Force in order to communicate with itself instantly.”
>
> Tom Paladino, original booklet, “The Freedom to Discover”

The word “fact” is retained because this is a direct quotation. The statement is not established by the evidence supplied in the booklet and should not be read as a verified scientific finding.

Wonder with room for questions

The enduring theme is Tom’s wish to understand nature as a whole. Readers can recognise that sense of wonder while asking what an experiment actually measured and whether another team obtained the same result.

MEANING AND MEASUREMENT

A spiritual interpretation can carry personal meaning. Establishing a physical mechanism requires reliable measurements and independent testing. One does not substitute for the other.

05 / THE LEGACY

Tom Paladino & Further Exploration

Tom Paladino developed the ideas behind Scalar Light. His original biography describes independent study inspired by Tesla, Hieronymus, Moray and Priore. This volume adds Kozyrev's ideas to the wider story of his influences.

Tom connected an interest in energy with a spiritual view of nature. He used terms including prana, chi, orgone, eloptic energy and zero-point energy. These come from different traditions and areas of study; grouping them together does not establish a single verified phenomenon.

Understanding the service today

Scalar Light describes its offering as a remote, photograph-based, non-medical wellness service for personal and spiritual exploration. That description should be kept separate from the proposed mechanisms and medical claims in the original biography. [5]

A CLEAR HEALTHCARE BOUNDARY

Scalar Light is not established as a way to destroy pathogens, treat disease or relieve symptoms. Seek qualified healthcare for symptoms and medical decisions. Do not delay medical care or change prescribed treatment on the basis of this booklet.

Questions about the service

REFERENCE NOTES

Sources & Notes on the Adaptation

The distinction between a source and proof of an effect.

The original is the source for Tom’s viewpoint and the claims discussed. Historical recollections support biographical context; NASA sources explain established astronomy. None of these establishes medical effects for Scalar Light.

1. Original booklet
Tom Paladino, Scalar Energy for the World, Vol. 3: Nikolai A. Kozyrev, Scalar Energy Astrophysicist. Source for the narrative, principal topics and direct excerpt. Read source

2. Biographical recollection
Alexander N. Dadaev, “Nikolai A. Kozyrev (1908-1983) - Discoverer of Lunar Volcanism (On the 100th Anniversary of His Birth)”, Progress in Physics, July 2009. Used for personal history, not validation of speculative physics. Read source

3. Solar science
NASA Science, “Our Sun: Facts”. The solar core, its high temperature and nuclear fusion. Read source

4. Light travel time
NASA Science, “Time Travel: Observing Cosmic History”. Why distant objects are observed as they appeared in the past. Read source

5. Current service description
Scalar Light 101 course landing page. Source for the service’s non-medical description and educational framing. Read source

Images & editorial approach

The observatory, lens-and-watch scene and gyroscope are AI-generated concept illustrations. They are not historical photographs or exact reconstructions and do not demonstrate the claimed effects. Tom’s image was supplied for this edition.

The original’s main sequence is retained, with an added section on Tom’s perspective. Unsupported claims about solar structure, instantaneous signals, gravity and medical effects have been corrected or contextualised. The revised subtitle avoids treating “scalar energy astrophysicist” as an established scientific designation.

Adapted edition prepared October 2026. Inspired by Tom Paladino; additional prose and explanations are editorial adaptations.
